

ALHASSAN TARAWALLY

Full-Stack JavaScript Developer

📍 The Gambia ✉️ baba.tarawally@example.com

🌐 github.com/babaltarawally 🌐 linkedin.com/in/baba-l-tarawally

PROFESSIONAL SUMMARY

Passionate Full-Stack JavaScript Developer with hands-on experience designing and building modern, production-ready web applications using React, Node.js, Express.js, MongoDB, and PostgreSQL. Experienced in developing scalable REST APIs, secure authentication systems, AI-powered business automation, and responsive user interfaces.

Strong understanding of modern JavaScript (ES6+), frontend architecture, backend development, database design, API integration, and real-world software deployment. Enjoys solving complex problems, building maintainable systems, and creating intuitive user experiences.

Currently seeking a Junior Full-Stack Developer or Frontend Engineer opportunity to contribute to impactful products while continuing to grow as a software engineer.

TECHNICAL SKILLS

■ Languages

JavaScript (ES6+) • TypeScript • HTML5 • CSS3

■ Frontend

React.js • Tailwind CSS • Responsive Design • Component Architecture • State Management • Modern UI Development

■ Backend

Node.js • Express.js • REST API Development • JWT Authentication • Role-Based Access Control • Middleware • File Uploads

■ Databases

MongoDB • Mongoose • PostgreSQL

■ Authentication & Security

JWT • Password Hashing • Authentication • Authorization • API Security

■ APIs & Integrations

REST APIs • Meta WhatsApp Cloud API • WhatsApp Catalog Integration • Cloudinary • AI API Integration (Groq)

■ AI & Automation

AI-Powered WhatsApp Automation • Natural Language Understanding • Intent Detection • AI Workflow Routing • AI-Assisted Customer Support • Multi-Tenant Business Automation

■ Tools

Git • GitHub • VS Code • npm • Postman • Railway • Vercel

FEATURED PROJECTS

WhatsApp Business Automation Platform

AI-powered, multi-tenant business automation delivered through WhatsApp

Node.js • React • Express • MongoDB • Meta WhatsApp Cloud API • Groq AI

- AI-powered customer conversations with natural language intent detection
- Multi-item ordering, restaurant ordering, and table reservations
- WhatsApp Catalog integration, lead management, and order tracking
- Business analytics and an admin dashboard for full operational visibility
- Multi-tenant architecture with database-driven responses and secure authentication

HomeFinder GM

Property marketplace for The Gambia

React • Node.js • Express • MongoDB • JWT

- Secure authentication and full property listing management
- Advanced filtering and search functionality
- Secure, JWT-protected REST APIs across all core operations
- Responsive UI built on a modern, scalable architecture

ADDITIONAL PROJECTS

Lead Management API

- JWT authentication
- Full CRUD operations
- Role-based access control
- RESTful API design

TaskFlow

Kanban-style productivity application

- Task management
- Team workflow support
- Modern UI
- Responsive design

CORE COMPETENCIES

▶ Full-Stack Web Development	▶ REST API Design
▶ Database Design	▶ Production System Architecture
▶ Authentication & Authorization	▶ AI Integration
▶ Business Automation	▶ Responsive UI Development
▶ API Integration	▶ Problem Solving
▶ Software Debugging	▶ Clean Code Principles

HIGHLIGHTS

- ★ Built production-ready JavaScript applications from frontend to backend
- ★ Designed scalable REST APIs with secure authentication
- ★ Developed AI-powered WhatsApp automation for real-world businesses
- ★ Integrated Meta WhatsApp Cloud API and catalog functionality
- ★ Built responsive, mobile-friendly interfaces with React and Tailwind CSS
- ★ Focused on maintainable architecture, scalability, and user experience
